### **About the Global Solutions Summit**

The annual Global Solutions Summit held by the Global Solutions Initiative brings together international research organizations, thought-leaders and decision makers from politics, business and civil communities.

The summit aims to provide policy recommendations on major G20 issues, thereby serving as a stepping stone to the Japanese T20 Summit in May 2019 and the Japanese G20 Summit in June 2019.

The Global Solutions Summit 2019 is focused on the Japanese G20 Presidency's priorities, including policy recommendations on sustainable development, infrastructure finance, financial architecture, trade and investment, climate change, future of work and education, social cohesion and the future of politics, SME policy, policies for aging populations, and more.

All discussions are linked to the overarching narrative of recoupling economic, environmental and social progress and the urgent need for paradigm change. We will furthermore highlight all relevant issues for the future of multilateralism in our discussions.

---

In addition to the annual conference in Berlin in early February, the GSI has developed further specialized formats to discuss key challenges:

- International **workshops and conferences**, comprising “deep dives” into policy areas
- **Dialogues** with policymakers and business leaders, based on Policy Briefs
- **National and regional meetings**, which explore the interface between global problem-solving and local decision-making
  - The Global Solutions **Summer School** takes place the weekend before and the day after the summit. It gathers future leaders from around the world and connects them with other changemakers.
- A **Global Solutions Journal** which compiles research from world-class thinkers, politicians and representatives from civil society and business.
